

## Appendix AD

### **AD. Stormwater Discharges Designated By the Department As Requiring Permits.**

1. Covered Stormwater Discharges. Sector AD is used to provide permit coverage for facilities designated by the Department as needing a stormwater permit, or any discharges of industrial activity that do not meet the description of an industrial activity covered by Sectors A-AC. Therefore, almost any type of stormwater discharge could be covered under this sector. The permittee must be assigned to Sector AD by the Department and may NOT choose sector AD as the sector describing the activities at the facility.
  - a. *Eligibility for Permit Coverage.* Because this Sector only covers discharges designated by the Department as needing a stormwater permit (which is an atypical circumstance) or the facility's industrial activities were inadvertently left out of Sectors A-AC, and the facility may or may not normally be discharging stormwater associated with industrial activity, the permittee must obtain the Department's written permission to use this permit prior to submitting a Notice of Intent. If the permittee is authorized to use this permit, the permittee will be required to ensure the discharges meet the basic eligibility provisions of this permit at Part I(B).
2. Stormwater Pollution Prevention Plan (SWPPP) Requirements. The Department will establish any additional SWPPP requirements for the facility at the time of accepting the Notice of Intent to be covered by this permit. Additional requirements would be based on the nature of activities at the facility and the stormwater discharges.

Monitoring and Reporting Requirements. The Department will establish any additional monitoring and reporting requirements for the facility at the time of accepting the Notice of Intent to be covered by this permit. Additional requirements would be based on the nature of activities at the facility and the stormwater discharges.
